

## Precautions

1. Do not use any discolored or expired eye ointment.
2. If you need to use more than one eye ointment at the same time, wait at least 5 to 10 minutes for the first ointment to be absorbed before administering another one.
3. If you need to instill an eye drop at the same time, instill the drop first and then wait at least 5 minutes before applying the ointment.
4. Eye ointments may cause temporary blurred vision. Avoid driving or operating machinery until your vision is clear again.
5. Store and discard your eye ointment according to the manufacturer recommendation.

6. Avoid using cosmetics and wearing contact lenses in case of eye infection or inflammation.
7. Never share your eye ointment with others to avoid cross-infection.
8. Steroid or antibiotic eye ointment cannot be used long term and must be used as directed by your doctor.
9. Promptly inform your doctor if you experience any unusual discomfort (burning or irritation) or side effects.

This guidance is for reference only .

You should always follow your doctor's instructions.  
Check with your doctor or pharmacist if you have any questions.

Do not share your medications with other people.

## How to use Eye Ointment

藥劑部  
Pharmacy

## Proper use of eye ointment

- 2 Use a cotton wool soaked with warm water to clean your eyelid from inside to outside if you have any eye dirt.

- 3 Remove your contact lens (if any) before applying eye ointment.

- 4 Tilt your head backward.

- 5 Gently pull down the lower eyelid to form an eye pocket, and then look upward.

- 6 Squeeze a small amount (0.5cm in length, about the size of a grain of rice) into the eye pocket. Avoid touching your eye or eyelashes with the tube tip to avoid contamination.

- 7 After applying the eye ointment, gently close your eyes for 1-2 minutes or blink a few times to spread the ointment. Do not rub your eyes with your fingers.

- 8 Use a clean tissue to wipe out any excess.

- 9 After use, recap the ointment immediately. Do not rinse the tip with water.
